

Basic Email Services

At Network Data Services, we understand that not all companies need the robust feature of a Microsoft Exchange Server.

Microsoft Exchange Server

With this in mind, we offer a basic email hosting solution for smaller companies.

The 5, 10 or 25 basic email hosting packages are the best choice for reliable personal and small business email. Included is a large 150MB of space, and a 20MB attachment limit - enough to send the biggest photos and documents as attachments.

Using Plesk setup, you can choose which names to use for email addresses, and change them any time you like. You can also set up forwarders, aliases, and catch-all addresses in minutes.

Check mail using your favorite email client, or try our easy webmail system for when you're away from home/office.

Webmail allows you to check your email any time, anywhere in the world by logging your webmail located at webmail.YOURDOMAIN.com

All of our hosting plans are backed with NDS technical support, so if you can't find the answers you need from our support pages, help is just an email or phone call away.

No Thrills Email Hosting (POP3/SMTP & HTTP Access only)

NDS-EH-B01	Up to 5 mailboxes
NDS-EH-B02	Up to 10 mailboxes
NDS-EH-B03	Up to 25 mailboxes

Many customers who purchase NDS Basic Email hosting also select our **Spam Filtering Services**.
